EDUCATION

University of Memphis

Memphis, TN

Master of Science in Data Science (CGPA : 3.74)

Aug. 2022 – May 2024

- Key Courses: Advance Machine Learning, Database Systems, Advance Statistical Learning, Multivariate Analysis

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R, SAS

Big Data and Cloud: Hadoop, Spark, Hive, Informatica, Ab Initio, AWS Sage Maker, Azure ML Studio

Visualization Tools: Power BI, Tableau, Excel, Matplotlib, Seaborn, GGplot2, Plotly, Atlair

AI/ML Systems: TensorFlow, PyTorch, Keras, Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Decision Trees, Reinforcement Learning, XGBoost, Sci-kit Learn, CNNs

EXPERIENCE

Data Science Specialist

August 2024 – Present

Los Angeles Unified School District

Los Angeles, CA

- Developed and maintained R and Shiny applications for educational performance metrics, including data visualization and reporting, improving accessibility and analysis efficiency by 30%.
- Created automated reports and dashboards using RMarkdown, Tableau, Power BI, and Excel, ensuring 99% data accuracy and streamlining decision-making processes.
- Managed backend Linux server configurations, including NFS storage, optimized database connections (PostgreSQL, SQL Server), and reduced query response times by 35%, ensuring efficient data retrieval and secure, scalable deployments.
- Implemented CI/CD pipelines in Azure DevOps and utilized Git for version control, automating deployment processes and improving application release efficiency.

Jr. Data Engineer

March 2020 – July 2022

Accenture Private Solutions

Hyderabad, India

- Designed and developed Ab Initio ETL workflows for extracting, transforming, and loading data from diverse sources (Hadoop, CSV, XML) into data warehouses, ensuring 98% data accuracy and seamless integration.
- Optimized ETL processes by conducting performance tuning, resolving bottlenecks, and improving SQL queries, resulting in a 25% reduction in data load times.
- Leveraged Ab Initio components (Sort, Dedup, Rollup, Join, Reformat) and tools (GDE, EME, Co:Operating System) to implement complex data transformations and maintain metadata lineage in Metadata Hub.
- Collaborated with cross-functional teams to translate business requirements into scalable ETL solutions, while maintaining comprehensive documentation and ensuring 100% traceability of workflows.

PROJECTS

Advanced Question Answering System | *NLP, LLMs, Transformers, GenAI*

Sep 2024

- Integrated state-of-the-art NLP models like BERT and RoBERTa for text preprocessing, named entity recognition, and reading comprehension, supplemented by rule-based systems for answer generation. Incorporated a feedback loop to continuously refine the models based on user interactions.

Otodom Analysis | *Python, Google sheets, Snowflake*

March 2024

- Led a Data Analyst Portfolio project, utilizing Bright Data for web scraping, Snowflake for database management, and Python and Google Sheets for data transformation and analysis, culminating in insightful property market reports for Poland.

CERTIFICATIONS

- Fundamentals of the Databricks Lakehouse Platform Accreditation (Databricks Academy - October 2024)
- Advanced SQL Proficiency (HackerRank November 2023)
- Accenture North America - Data Analytics and Visualization Job Simulation (Forage- January 2024)
- Power BI Service Fundamentals (LinkedIn November 2023)
- Python for Data Science Essential Training (LinkedIn December 2023)
